April 23, 1980

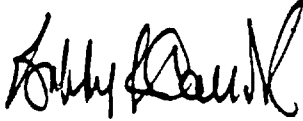

SUBJECT: Analyses of Lee's Lane Landfill Drum Samples

FROM: Bobby J. Carroll, Chief
Laboratory Services Branch

TO: Wayne Mathis, Chief
Disposal Site Unit

As we discussed on April 21, 1980, I feel that the State of Kentucky should be encouraged to analyze the above-referenced samples. Since the State Hazardous Materials and Waste Management Division has GC/MS capability available, they should perform the initial analysis. However, if required, we could provide confirmatory analyses.

In general, we should encourage all of the States to perform as many analyses as they can, rather than relying on EPA for analytical support.

Bobby J. Carroll

I left message w/ Jeanette Tant that KY had withdrawn their request for ~~some~~ analytical assistance.
